SUMMARY

Versatile IT professional with experience in server and network operations, system monitoring, installation, and troubleshooting. Skilled in maintaining stable IT infrastructure and resolving technical issues efficiently. Also experienced in web development using PHP, Laravel, and modern frontend technologies, with a strong understanding of system architecture and application workflows.

WORK EXPERIENCE

Analyst Server & Network - BP Tapera

October 2025 - Present

Server & Network Analyst with hands-on experience in monitoring system performance, installing and configuring server and network infrastructure, and troubleshooting technical issues. Skilled in maintaining reliable operations, identifying root causes quickly, and supporting daily IT infrastructure needs across both server and network environments.

IT - Swiss-Belcourt Makassar

August 2024 - August 2025

Manage and responsible for all related to IT Department, Make sure all IT things are working properly as good standart, Make annual IT budget, IT SOP (preventive and security), Training for achievement to all hotel employees, Make sure hotel technologi is up to date, Make sure all database in secure condition and backup every day, applied for Disaster Recovey Plan and Business Continuity Plan.

Program Developer

Feb 2023 - Mart 2024

specializing in PHP and the Laravel framework, the primary responsibility is to develop web applications end-to-end, focusing on creating responsive user interfaces using HTML, CSS, and JavaScript. The developer will utilize Laravel for backend development, managing server logic, database interactions (using Eloquent ORM), and API communication (RESTful APIs). Additionally, the role involves using Git for version control, deploying applications on cloud services (such as AWS or Heroku), and ensuring that the code is tested (unit testing) while following best practices for scalable design. Collaboration with the team and effective problem-solving are essential components of this position

Majoring In Information System - STMIK PROFESIONAL

2020 - Aug 2024

Information Systems graduate with practical experience in server and network operations, including system monitoring, installation, and troubleshooting. Skilled in maintaining stable IT infrastructure and supporting daily operational needs. Complemented by a background in web development using PHP, Laravel, and modern frontend technologies, providing a solid understanding of system architecture and application workflows. Known for quick learning, strong problem-solving abilities, and the ability to work effectively in technical and collaborative environments.

IT Intern - Barru Barakah Properti (Bosowa)

Feb 2024 - Apr 2024

I completed an internship as an IT Staff at Barru Barakah Properti, where I was responsible for developing a company profile website to support business promotion and information management. I also designed and implemented a psychotest system for recruitment purposes, built and managed a parking management system to improve operational efficiency, and handled network setup and maintenance to ensure stable connectivity. In addition, I developed a QR code-based application for employee identification and attendance.

WORK EXPERIENCE

IT Intern - Lintasarta

Mar 2019 - Apr 2019

Proficient in the complete lifecycle of network management, including thorough installation and configuration of infrastructure. Focused on maintaining and optimizing network performance through continuous monitoring, and possessing strong expertise in troubleshooting to efficiently identify and resolve diverse network issues.

Profesional Game Player

Mar 2018 - 2019

Former Fortnite professional player with competitive experience in online and offline tournaments. Demonstrated strong strategic thinking, quick decision-making, and high mechanical gameplay skills. Experienced in team coordination, competitive practice routines, and maintaining performance under pressure. Gained valuable discipline, focus, and teamwork skills through competitive gaming.
